DOCTORS

#### **Dr. Stephen Lownie - Best Neuro Surgeon of Canada**

I would like to share the information with you that words can not describe the compassion, help we received from Dr. Stephen Lownie, a neuro-surgeon of Univeristy Hospital in London, ontario.

On May 26, 2006, our daughter had a ruptured AVM and fortunately Dr. Stephen Lownie had performed her surgery. Her case was extremely complicated but Thanks to Dr. Lownie's expert knowledge and Midas touch that today she is absolutely fine. I would like to mention this to everyone that he not only has a Midas touch, is also extremely compassionate and treats his patients like his family. I would say he is the BEST neuro surgeon of the world. May he Live very very Long !!!
